Susan,

Thank you for providing the attached list of studies that you intend to submit to the MDEQ as part of the proposed data summary reports meeting. The attached list was received by Liane Shekter Smith at the Friday, May 6, 2005 meeting that was held to discuss the Framework document.

We noticed during our review of the list that the Bioavailability Study and the associated soil sampling protocol were not included. For purposes of ensuring completeness, please revise the list to identify and describe all of the studies, work plans, associated analytical data, etc., known as of this date, that Dow is conducting or planning to conduct for use, or potential use, in satisfying Dow's off-site corrective action obligations under Part 111 of Act 451.

Please provide this information within two weeks of receipt of this e-mail, so that the MDEQ and the U.S. EPA have a clear understanding of all the work being conducted by, or for, Dow for off-site corrective action purposes.

We will be meeting with Ben tomorrow and would be happy to discuss this request in further detail at that time.

Thank you for your cooperation in this matter.

George Bruchmann, Chief
Waste & Hazardous Materials Division
Michigan Department of Environmental Quality
